SYNNEX
SERVICE*Solv* ®

CHROME AND G SUITE SERVICES

With a variety of value-added services, SYNNEX SERVICE*Solv* can help supplement your company's service offerings, skillsets, and geographic reach so you earn more margin. Here's what we offer for Chrome and G Suite.

G Suite Services:

- G Suite provisioning
  - » Domain setup
  - » Security configurations, including routing rules, spam settings, mobility settings, drive settings
  - » Integration with Active Directory/Google Active Directory sync integration
- Migration services
  - » From File Server to Google Drive and from external third-party platforms to Drive
  - » Migration from third-party web mail systems like Office 365, Exchange Server, or in-house mail servers
- Change management
- Post go-live support
- Training for end-users and admin teams

Chrome Services:

- White glove services, including on-site and pre-shipment integration
- Browser deployment services
- App migration development
- App development and training

G Suite Support Services:

- Priority support for P1 level issues
- Technical support to customer administrators during regular business hours (9AM ET – 5 PM PT). Ability to work with a familiar certified technical resource before having to submit a Google Support ticket. Google's standard 24x7x365 email and phone support will augment our Premium Support after normal business hours.
- Email communication updates. This communication addresses potential gaps and showcases additional solutions that complement the Google ecosystem.
- G Suite administrator and support training

- End-user training
- AD integration
- Grab-and-go program
- Project management
