

Chrome Zero-Touch Enrollment: Device Deployment Made Easy

Provisioning new devices can be a challenge for partners. Currently, there is a manual component that slows down the process, leaves room for error, and makes it difficult to deploy devices directly to the end-user. The solution? Chrome Zero-touch Enrollment.

Chrome zero-touch enrollment

With zero-touch enrollment, partners can ship Chrome OS devices that will automatically enroll as soon as the end-user connects to the internet. Available for both Chrome Enterprise and Chrome Education, zero-touch enrollment ensures Chrome OS devices are ready out of the box.

How it works

1

Buy

When your customer purchases a new device, the Google Admin Console generates a preprovisioning token and passes it to you.

2

Ship

You then register the device with Google and drop ship the device directly to the end-user.

3

Log in

Upon receiving the device, the end-user will connect it to WiFi. Google will then confirm the device's identity for security. The device automatically enrolls into the customer's domain and the end-user can now log in.

Not all Chrome OS devices are ZTE enabled.

Chrome Zero-Touch Enrollment: Simplified with SYNNEX

SYNNEX simplifies device deployment by offering Chrome Zero-touch Enrollment services. Ship devices straight from our warehouse directly to your customers' hands. Decrease time and costs by using SYNNEX' first class integration facility.

SKU: 6075276 (QTY. 1- 499) SKU: 6075279 (QTY. 500+) Does not include OS upgrade

How it works

1

Buy

Purchase a Chrome OS device that supports ZTE and the appropriate SYNNEX ZTE Integration SKU. Share the pre-provisioning token with your service partner, SYNNEX.

2

Ship

SYNNEX registers the Chrome OS device with Google and ships the device directly to your end-user.

3

Log in

Upon receiving the device, the end-user will connect it to WiFi. Google will then confirm the device's identity for security. The device automatically enrolls into the customer's domain and the end-user can now log in.
