Convert Existing Subscriptions to CSP Using the SYNNEX Azure Move Validation Tool

Moving your Pay-As-You-Go (PayG) and Enterprise Agreement (EA) customers to CSP doesn't have to be complicated. Through the SYNNEX Azure Move Validation Tool, you can develop a plan ahead of the move to ensure a seamless, simplified transition, saving both time and money.

Although the SYNNEX tool uses the same validation routine as Microsoft Azure, it does not automatically perform the move, meaning that the tool can be run during business hours. That's right, with the SYNNEX Azure Move Validation Tool, you can perform your validation at any time, even during business hours. Not only is our tool more convenient to use, we at SYNNEX also provide additional customer support like:

Experience based
suggestions for resolving issues

Detailed technical resources

Microsoft documentation access

Service performance or assistance
