

Meet Surface Headphones 2

The smarter way to listen

Experience your calls and music like never before with Surface Omnisonic sound and 13 levels of adjustable noise cancellation. Use the on-ear dials to easily turn up the volume or tune out background noise for ultimate focus. Advanced microphones ensure you're heard loud and clear on calls. Plus, intuitive touch controls let you answer/end calls or play and pause tracks.

Immerse yourself in silence for focused work. Adjustable active noise cancellation technology means you choose how much you tune out. Dial up the silence when surrounding noise is at its loudest. Or dial up your surrounding sound when you want to be more aware of what's going on around you.

Get ahead with your headphones. Let your voice do the typing. Use dictation in Word, Outlook, and PowerPoint.*¹ Add real-time captions while presenting in PowerPoint on conference calls (Windows 10 required). And, use touch to play music and make calls.

Comfort and style you'll want to wear all day. Settle in for your workday or chilling at home with comfortably soft, breathable ear cups and a lightweight, balanced fit.

Amazing audio for the best conferencing experience. Surround yourself with spectacular sound thanks to a four microphone-array per ear cup for exceptional voice clarity and noise cancellation and an optimized sonic cavity engineered for richer, clearer acoustics.

Technical specifications
