

# Get Your Cisco dCloud Demo

Sometimes you just can't explain it in words. The customer wants to see it in action. Luckily, Cisco has a tool for that. dCloud is Cisco's cloud-based demo platform, for you to show customers exactly what Cisco solutions can do. SYNNEX Comstor engineers are well-practiced in many of the demos offered and are happy to either deliver the demos to your customers on your behalf, or teach you how to do the demos yourself. Click below for the complete list of Cisco dCloud demos that SYNNEX Comstor is ready to help you with, right now.

## SYNNEX Comstor offers dCloud demos in:

- HyperFlex
- SecureX
- Umbrella
- AMP for Endpoints
- Workload Optimization Manager
- UCS Director
- FMC
- Meraki
- Initial vWLC setup, basic options and configuration
- Enable Secure Access Wireless
- Cisco Calling and Meeting Integration with MS Teams
- Cisco Hosted Collaboration
- WebEx Calling

**Ready for a demo? Go here to schedule one.**

Partners can log a ticket through the EC Express portal at:

- United States: <https://ec.synnex.com/ecx/>
- Canada: <https://ec.synnex.ca/ecx/>

Then follow this flow:

ECExpress > eServices dropdown > Service Request Portal > Comstor Pre-Sales Engineering > Comstor Pre-Sales Engineering Support

*Internal Users (Comstor / SYNNEX employees)* can log a ticket through Synnex Central under Maintenance > Portals > Service Request Portal > Comstor Pre-Sales Engineering
